excellent concept, terrible value - tarot card readings last about 15 seconds, and the horoscope was only slightly better with like a 1-2 sentence blurb... if you're not interested in the minigames you'll be done within 2 minutes.

the fortunes are so weak since there's no questions for you to answer or any other way to feel like the experience was customized, and the explanation of the cards and their meanings are virtually nonexistent.

this was after being frustrated by having to figure out how the controls worked for like 20 minutes, if you're on the rift you need to right click the game in your library and launch it in "other vr" mode.. I think that Napoleon is a pretty nice step from Empire, even though they are both pretty good. Napoleon includes the ability to liberate nations and set up their protectorates, like Romania, Brittany, and Poland. The system of converting buildings and the nice tech tree are also pluses. Some things I don't like that much are the limits on generals. Also, no religious agents, although given the short campaign time, they would not be able to realistically and significantly convert populations. Finally, one of my favorite features carried over from Empire: national buildings. For example, the Kremlin Armoury in Moscow.. This is a fine little science-fiction visual novel. It's very tropey and pulpy but you may like that sort of thing.. **Smoothness**

I must say that this runs pretty smoothly on my PC and it seems that the devs have really improved stability in the recent patches. Turns last no more than about 30-40 seconds for me which is definitely good for a game like this.

The setting and features

The setting is great, the Great Powers have their own goals and agendas, there are tons of different units and I love how you are sending expeditions to the colonies as units and then using decisions to influence how those develop. The colonization is definitely something amazing here.

The military system is simply amazing with enough units to make your head spin. Overall, it is a very good and tested system for military matters and it is a much better game than Victoria 2 and Hearts of Iron when it comes to military things and the depiction of 19th/ early 20th century conflicts and WW1. It suits how armies were moved and organized back then.

The setting, however, is not perfect. In 1880 Napoleon was no longer the leader of France, and definitely not a president of the Republic,

Summary

Give this game a chance and try it. It works really well now and it can certainly be much more fun than Victoria II.. This looks and plays almost exactly like the game "The Deal", which I also loved. I just started playing this game, but I can already tell you I am going to love it. More detailed graphics than the average JRPG (just like The Deal game), and good music, at least one song I recognize also from The Deal, I believe. The story, characters and fighting system seem to be good as well. I will update my review if necessary. I recommend this game to those who love JRPG/VRPG maker games.

After playing a few hours, my one gripe is the unbalance, having too many monster fights on the main world when walking. I am stuck in one place where it is an attacked castle. I have requested help where I cannot seem to get very far without my two characters dying. I have tried several times and have requested help on the forums without any success. I hope that changes.. Quick Breakdown: It's the Season Pass for *Alien Isolation*, it gives you a few *Survivor Mode* levels. For the people that loved *Alien Isolation's Survivor Mode*, but get it on sale.

Genre: Survival Horror / Stealth

Review Date: 2016-07-05

2017-09-06 Edit: I forgot about this until someone commented on this review, and after thinking about it for a bit, decided to change my stance on it. The actual content of this Season Pass is alright for what it is, a few extra *Survivor Mode* levels. Not bad if you really enjoy those.

The problem lies in that this Season Pass doesn't include the mini-campaign DLCs. At that, one of those campaign DLC's was released on the same day as the base game, and the other a mere 8 days later. Seeing as they're short enough that they should've just been in the base game to begin with, it just feels like a cheap cash grab. Those DLC's aren't bad in and of themselves, but they do still feel as if they should just be bonus content in the base game. It's a shame, DLC can and should be used to add to and enhance games, but in a way that isn't just trying to squeeze fans for as much money as possible. If you really like Survivor Mode, grab this on a sale, otherwise save your money.

2017-02-18 Edit: Someone pointed out to me that the Season Pass does not come with the campaign DLC's, only the Survivor Mode DLCs (thanks Xetelian). I'm not sure how I missed that the first time, but apologies for the misinformation. I've ammended my review to reflect this.

Full Review: The Season Pass does NOT contain the campaign DLC's for Last Survivor and Crew Expendable, which are fun 30 minute romps set during the original Alien movie, and good for anyone that loves that film. They aren't essential, but they're fun. As they do not come with the Season Pass, I'd recommend purchasing those seperately on sale if you're a diehard Alien fan.

The DLC that DOES come with the Season Pass are extra levels for Survivor Mode, which I didn't play much, but it's something for anyone that enjoys that.

I'd recommend playing the game first and then trying Survivor Mode to determine if you want more levels for it or not, and therefore if the Season Pass is worthwhile. If not, I'd get just the campaign DLC's. Either way, I'd wait for the DLC to go on sale before buying.

If this Pass came with all the DLC, namely the campaign ones that it's missing, I'd give it a recommendation. As it stands currently, I have to advise against it, unless you really enjoy Survivor mode, then you may as well. The content itself is fine if you enjoy the mode, but with the Pass lacking some of the DLC, it just feels cheap and incomplete.. Short, simple, sweet, sentimental. These are the words I would use to sum up Trigger Runners. Done in a retro style, its music and graphics hearkening back to the games of yesteryear, it's a pleasant throwback compared to what we usually see.

Gameplay is brief, only about thirty minutes, but it does strike me as reasonably replayable, obviously needed in this format. The story, told via cutscenes, is basic but endearing.

The biggest flaw I see is that the jumps should take a heart away rather than automatically kill you, as they really seem to be the hardest opponents in the game. Besides that, the gun needs to have a broader angle - you should be able to shoot all around you. Shooting stuff just under you is impossible at present. The only other issue is a part where, with the "barrier" shooting on one level, the little bombs you couldn't blow up blocked your shots, making it nigh impossible to not get hit. It also needs a volume control on the options menu, as well as the ability to pause when a boss is loading.

Does this have particularly engaging gameplay? No. Most bosses are very easy and lack defining traits. But it is a fun, quaint little game to just kick back with and enjoy. Retro, cheap, and has trading cards? I'll take it. Especially recommended if on sale.. This game is goddamn awesome!!!. Pre customised not at all like the titles says! rip off. Do you like wild bunny Racism and over the top people shouting slurs at you while kicking cars as a bunny who drags his butt all over?? Peak video game development. Buy now.
